

Anna Nguyen  
CS315 - Assignment 1

## 1. Introduction

This website is designed to help my mom's business. She is selling wontons and many other foods. As a daughter, the best thing I can do is to promote her business, and here I'm making a website for her.

## 2. HTML pages

### a. index.html

This is the home page, on which I used

- a link to make a phone call,
  - a link to email,
  - a nav bar to implement the links to the other pages in the header,
  - an ordered list of contact information,
  - and a copyright footer.
- There is also a logo that links to the home page on every page.

The screenshot shows a website layout for "Taste of Home". At the top left is a circular logo with a stylized letter 'T'. To its right is the text "Taste of Home". Below this is a navigation bar with four items: "Home", "Menu", "Gallery", and "Location". The main title "Delicious Homemade Meals for You" is centered above a paragraph of text. A blue link "Click Me When You're Hungry" is present. Below the title is a section titled "Why Us?" containing a paragraph about the family-owned nature of the business. Another section titled "Contact Us" follows, with a paragraph encouraging visitors to tell their family and friends and a "Contact us today!!" button. A list of three ways to contact them is provided, along with a copyright notice at the bottom.

*index.html*

### b. menu.html

This page displays our menu using

- a link to download a PDF
- description lists of the name of the food and its description
- a link to the gallery page to show what the food will look like after assembling everything

 Taste of Home

[Home](#)   [Menu](#)   [Gallery](#)   [Location](#)

## Our Menu

[Download our PDF menu](#)

### House Special Wontons

**Traditional Pork Wontons \$9.99**  
A plate of 12 wontons filled with seasoned ground pork, ginger, garlic, cabbage, topped with green onions.  
Served with a side of our homemade dipping sauce.

**Fresh Shrimp Wontons \$11.99**  
A plate of 12 wontons filled with shrimp, seasoned ground pork, ginger, garlic, cabbage, topped with green onions.  
Served with a side of our homemade dipping sauce.

### Signature Char siu

**Char siu \$10**  
Cantonese-style barbecue pork, marinated in a sweet and savory sauce, then roasted to perfection.

## Visit Us Today

**Business Hours**

Monday - Friday: 11:00 AM - 8:00 PM  
Saturday and Sunday: Closed

**Our Address**

*123 Food Drive,  
St. Louis,  
MO 63101*  
[Get Directions](#)

If you don't want to drive, call us at [234 567 8889](#) for delivery

*location.html*

### 3. HTML5 elements

- <head> is a standard for every HTML file that includes machine-readable information about the document. Here I can consist of my page's title, CSS, and JavaScript files.
- <header> and <nav>: I made a header and navigation bar to the home, menu, gallery, and location page, along with a logo using <a> and <img>, which also links to the homepage
- The heading elements <h1>, <h2>, etc., are used to emphasize the title of each section and important information
- Content elements <p> to make a paragraph, <b> to bold the important information, <i> to italicize
- List elements <ul> unordered list for the pages, <ol> an ordered list for contact information, <dl> a description list for food and its description
- Anchor element <a> to navigate between pages, different parts of the page, links to call, email
- <img> to include our food images with figure and figure caption elements to show how everything is assembled
- <footer> copyright

### 4. Discussion

**Note:** Our personal information, such as phone number and address, is redacted due to privacy concerns.

This page only has HTML and a little CSS for styling. It needs to be improved by adding styles, JavaScript for a better interactive website, and more information. I have used W3Schools and MDN Web Docs sources to complete this assignment.
